School Information Management System (SIMS)

- A school information management system
- Designed to empower education institutions to manage and track payments for easy service delivery, better planning and performance tracking.
- Transforming school administration with an easy-to-use system for payments, planning, and performance tracking.

Problems Solved

PROBLEM	SOLUTION WE OFFER
Manual data entry and errors	Automates data capture, reducing risk of error,
Academic data sometimes gets scattered and difficult to manage.	Centralizes all school data (students, fees, academics, staff).
Limited communication with parents and guardians and the school.	Improves communication via SMS and reports.
Lack of Transparency & Accountability	Audit trails and secure records that make every transaction visible and traceable,
Fees collection sometimes is time-consuming, prone to errors, and lacks transparency.	Automates fees payment codes, receipts, and reports
